TEAM CHARTER AGREEMENT

Group project: Solar PV Market
Course: 712L
Group: ZhengWangZhou
Team members: Amy Zheng, Claire Wang, Xuan Zhou

1. Team Main Question

- Our project will address the following central question:
- Which destination markets, product categories, and sales periods should Chinese solar PV exporters prioritize to improve expected commercial returns?
- Supporting Questions
  1. Market selection:
     - Which destination markets have the largest and most sustained growth in China's solar PV exports?
  2.Product positioning:
     - How does the composition of China's solar PV exports differ across destination markets and evolve over time, and how do these patterns align with local PV deployment and manufacturing activity?
  3.Timing:
     - Do priority country product markets exhibit recurring monthly export patterns that can support shipment planning?
  4.Commercial feasibility:
     - Which country product opportunities remain commercially attractive under alternative assumptions about selling prices, costs, attainable sales volumes, and applicable tariffs?
- Target Audience:
  - Chinese solar PV manufacturers and exporters, particularly business development, international sales, and strategic planning teams seeking to identify high-potential export markets, optimize product positioning, and improve shipment timing and profitability.
  - Trade associations and export advisory organizations supporting Chinese solar PV companies with international market entry and expansion strategies.

2. Communication Agreement

- Primary channel: Wechat
- File collaboration: GitHub repository and Google Docs
- Decisions: Discuss major changes together and document agreed decisions in the primary channel.
- Disagreements: Share concerns respectfully, compare evidence, and resolve by consensus.

3. Responsibilities and Quality Standards

- Meeting Plan
  Regular meeting: once to twice per week, class period or sometimes over the weekend
  Agenda: Review progress, blockers, upcoming deadlines, and next actions.

After each meeting: Record action items, owners, and due dates in [tool / location].
Attendance: Notify the group as early as possible if unable to attend.

- Responsibility:
    - Member 1: Amy Zheng
        - Coordinate group submissions and ensure all required deliverables are submitted on time.
        - Manage the GitHub repository, ensuring all project files are properly organized and up to date.
    - Member 2: Claire Wang
        - Identify, collect, and evaluate relevant datasets for the project.
        - Develop scripts for data collection, cleaning, and preprocessing.
    - Member 3: Xuan Zhou
        - Lead the development and refinement of the main research question and supporting questions.
        - Identify appropriate research methods and oversee the methodological approach.

4. Agreement and Confirmation

By approving this charter, all members agree to the communication norms, responsibilities, research direction,audience, and meeting plan described above. The group will revisit this agreement if the project needs change.
